## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-28 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Objections***

Claim 3 is objected to because of the following informalities: To maintain consistency throughout the application, applicant is suggested to insert the claim numbers to which claim 3 depend from. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 1,2,4,5,7,11,12,14-22,24-28 are rejected under 35 U.S.C. 102(e) as being anticipated by Leger (PN 5,745,511).

Figure 3B illustrates a discontinuous phase plate (127) placed between reflectors within a resonator of a laser system to provide phase adjustment and mode selection.

As disclosed in column 6, one purpose of custom phase-adjustment element 127 is to

Art Unit: 2828

enhance the modal discrimination of the laser resonator system. Another purpose of custom phase-adjustment element 127 is to introduce varying amounts of phase shift into various portions of the transverse cross section of laser beam.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3,6,8-10,13,23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Leger (PN 5,745,511), Fink (PN 5,283,796) and Harris (PN 3,605,039).

Regarding claims 3,6,8-10,13,23.

The different types of resonators as stable and unstable using phase plates are well known in the art as disclosed by Leger.

Phase plates used in a transmission or reflection mode are well known in the art as disclosed by Fink.

Art Unit: 2828

The uses of phase plates in passive resonators are well known in the art as disclosed by Harris.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1,3,6-9,11 and 20 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 13, 11-13, 15-17 and 21 of U.S. Patent No. 6,134,259. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims pertain and encompass the same scope of laser resonator provided with a phase plate within the resonator for phase adjustment and mode discrimination.
